EDUCATION

Noida Institute of Engineering and Technology — B.Tech, CSE (IoT)	2027 CGPA: 8.14
Adarsh Indian Secondary Public School, Deoli — Intermediate (CBSE)	2022 70.6%
DAV Public School, Nabinagar — Matriculation (CBSE)	2020 91.2%

TECHNICAL SKILLS

Programming: Java (DSA), Python, JavaScript

Frontend: HTML, CSS, React, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, IntelliJ IDEA

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROJECTS

Yggdrasil — Realm-Based Social Platform | React, Vite, Tailwind CSS, Node.js, Express, JWT, PostgreSQL

- Built a personality-driven social platform where users take a 20-question test to get assigned to one of the Nine Realms and join compatible communities.
- Implemented JWT-based authentication with secure password hashing via bcryptjs and role-based access control.
- Designed a PostgreSQL schema covering users, realms, posts, comments, messages, and personality scores with pg-mem fallback for local development.
- Engineered a real-time realm dashboard with posts, comments, reactions, member lists, realm chat, and a global feed.
- Secured Express API with rate limiting, Helmet, compression, and request validation; deployed frontend on Vercel.

Cryuze — Service Marketplace Platform | React, Node.js, MongoDB, Socket.IO, Razorpay

- Designed and implemented REST APIs with JWT-based authentication and role-based access control.
- Integrated Razorpay payment flow with secure order verification and transaction handling.
- Built real-time bidirectional chat using Socket.IO with event-driven architecture.
- Optimized MongoDB queries and indexing for faster service discovery and filtering.
- Structured backend for modularity, scalability, and separation of concerns.

ProType — Multiplayer Typing Platform | HTML, CSS, JavaScript, Node.js, Express, Socket.IO, Vercel, Render

- Developed real-time multiplayer game rooms with code-based joining, host-controlled settings, and synchronized start using Socket.IO.
- Implemented solo and multiplayer typing modes with configurable time/word tests, punctuation/number options, and live feedback.
- Engineered live leaderboard updates by collecting and ranking player WPM/accuracy.
- Deployed frontend on Vercel and backend as a separate Node service with environment-based URL configuration for production.

ACHIEVEMENTS

- Solved 350+ DSA problems across LeetCode and similar platforms.
- Qualified MCAT (My Career Aspiration Test) conducted by MyAnatomy.
